

Eating Before Performance

Scenario

The day of a performance, I often feel nervous and sometimes skip lunch, only to feel hungry later. Performances are usually in the evening so I know I need to eat something beforehand. Playing extended sets, I rarely get a break. What foods can I eat and at what times to supply me with enough energy to perform well the entire time?

Goals of Nutrition Before Performing

- Consume a carbohydrate-rich snack or meal before performance to top off muscle stores. With pre-performance jitters, liquid meal replacements may be a better choice than whole foods.
- Include small amounts of protein in your pre-performance meal(s). Protein helps build and repair muscle tissue. Adequate protein before a performance may help reduce post-performance muscle soreness.
- Choose pre-performance meal(s) that are low in fat and fiber to ensure optimal digestion.

Pre-performance Foods & Fluids

3–4 Hours Before Performance

- Peanut butter & honey on toast + instant breakfast drink
- Fruit and yogurt smoothie + low-fat granola
- Oatmeal with brown sugar and almonds + skim milk + banana
- Low-fat cottage cheese + apple butter + crackers + fresh grapes
- Lean hamburger on bun with lettuce & tomato + side salad + yogurt-fruit parfait
- Turkey and Swiss sandwich + fruit + sports drink
- Low-fat tuna melt sandwich + fruit cup + fat-free yogurt

30–60 Minutes Before Performance

- Sports drink or water
- Sports gel, sport beans or gummies, sports bar
- Piece of fruit or jam sandwich

Tips to Take With You

1. Experiment with foods and drinks in practice and lower level competitions to determine the best timing and your tolerance for pre-performance foods.
2. Practice! Figuring out what works best for you will boost confidence in eating before performance.
3. Fuel muscles early with easily digestible carbohydrate-rich foods and beverages for training or competition later in the day.
